

5. REGIONAL BUSINESS FORUM

INVITATION

November 15, 2022, Novi Sad, Serbia

The Autonomous Province of Vojvodina and the Assembly of European Regions, in cooperation with the Chamber of Commerce and Industry of Vojvodina, Vojvodina Development Agency and Enterprise Europe Network, organise the Fifth Regional Business Forum, which is taking place on November 15, 2022. This Regional Business Forum will be organised as a combined (hybrid) event, with a possibility of following the event online, in real time, and on site. The conference will be organised with maximum health and safety measures in place, adhering to all prescribed epidemiological measures.

The Forum participants include eminent companies from the region, as well as regional chambers of commerce, regional development agencies and other institutions which provide support to development of small and medium-sized enterprises and enhancement of the economic climate for business and new investments.

The Regional Business Forum offers you a possibility to share and present your business potential and ideas and to connect with companies and institutions which support the development of business environment and inflow of new investments.

This worldwide event provides additional support to companies to find international partners. The participants will be offered a chance to arrange and hold B2B meetings with companies and institutions participating in the Forum, according to their own needs and based on the information on registered participants.

Sectors which will be presented are as follows:

- Information and Communication Technologies and Creative Industry
- Circular Economy
- Green Agenda
- Agriculture and Food Processing Industry

You can access the platform for organisation of “one-on-one” meetings by clicking the following link: <https://rbf2022.b2match.io/>. It provides a possibility to promote business cooperation between regions, including free trade and production agreements, joint projects i.e. joint investments and joint access to third markets, as well as the exchange of technologies and know-how and collaboration in projects characterised by a high degree of competitiveness and innovations, funded by the EU and other donors.
